

## **FOR IMMEDIATE RELEASE**

### **Gutterglove® Announces New Addition to LeafBlaster Pro® Portfolio, Providing Full Suite of Products for Contractors**

Gutterglove®, an innovator in the home improvement space focused on people, products, programs, and technology, is expanding its LeafBlaster Pro® portfolio of premier gutter protection solutions. The introduction of the new Frame-Reinforced Stainless Steel Micro-Mesh Gutter Guard will provide contractors with a full suite of gutter protection solutions.

"At Gutterglove, we are dedicated to growth and innovation, consistently expanding our product portfolio to meet the evolving needs of our wholesale distributors and the professional contractor," says Troy Schmidt, Gutterglove's Director of Wholesale Sales. "The introduction of the Frame-Reinforced Stainless Steel Micro-Mesh Gutter Guard to the LeafBlaster Pro brand underscores our commitment to providing professionals with high-value solutions designed to help grow their business."

Built on a proven product design optimized to withstand the heaviest of debris, the Frame-Reinforced Stainless Steel Micro-Mesh Gutter Guard is the toughest gutter guard offered in the LeafBlaster Pro portfolio. The material is designed with maximum strength and protection in mind to withstand the elements, and patented technology allows for superior performance, even in the worst weather conditions.

Perfect for homes in densely wooded areas or harsh climates, this new gutter guard is made with a patented T6-treated aluminum slotted-frame design and stainless-steel micro mesh, allowing rainwater to flow freely into the gutter while blocking heavier storm debris, branches, leaves, and pests.

Mike Maddern, Gutterglove's Chief Marketing Officer, adds, "At Gutterglove, our passion for product development, performance, and quality is unwavering. The Frame-Reinforced Stainless Steel Micro-Mesh Gutter Guard exemplifies our dedication to using our decades of experience and proven performance to continue setting new standards in the industry. We take pride in delivering solutions that solve real-world challenges and exceed the expectations of our customers and partners."

The LeafBlaster Pro Frame-Reinforced Gutter Guard is available to purchase beginning in April 2024 through professional building material suppliers. With a dedication to excellence, a steadfast commitment to integrity, and a spirit of generosity, Gutterglove remains firmly focused

on its mission to protect every gutter in every home and continue innovating within the home improvement sector.

### **About Gutterglove®**

Gutterglove® manufactures gutter guards and accessories designed to protect any home, regardless of roof type or gutter size, with both do-it-yourself and professionally installed product options. Their innovation extends beyond products into new programs and technology that deliver seamless support to customers and contractors nationwide.

Starting in 1996 as a gutter cleaning business, the team at Gutterglove noticed that many of the gutter guards on the market could perform better. Gutterglove explored new designs, the best materials, and customers' needs to create an extensive patented portfolio of the highest quality gutter guards available. Gutterglove is proud to offer the Nation's Most Trusted Gutter Guards®.
